

Sprint 4 Report
Portfolio Tracker
Portfolio Trackers
12/8/2020

Actions to stop doing:

- Stop submitting last-minute pull requests.
- Stop breaking down tasks unnecessarily.
- Stop adding tasks in the middle of sprints

Actions to start doing:

- Submit pull requests before the last day of the sprint.
- Write tests for edge cases.
- Make sure tasks are broken down into testable chunks

Actions to keep doing:

- Continue to use GitHub for version control
- Use Slack to notify the team when a pull request is made before merging.
- Use Jira to keep track of the status of user stories and their tasks
- Show up to meetings on time; we have been doing a good job of this.
- Using slack and zoom to discuss any possible problems with the team outside meetings.
- Keep track of possible errors or edge cases within our code. Test our code from the user's perspective.
- Time estimates for user stories

Work completed/not completed

Completed:

- PT-43: As a user, I want to have my data protected by an account system.
- PT-66: As a user, I want the product to have documentation.

Not Completed:

- None

Work completion rate:

User stories completed during sprint: 2

Estimated ideal work hours: 54 hrs? 10.8 hrs/person

User stories per day: 0.14

Ideal work hours per day: 3.86

Number of days during sprint: 14
