Sprint 3 Report
Portfolio Tracker
Portfolio Trackers
11/24/2020

Actions to stop doing:
- Stop taking multiple tasks at a time so that others who finished their tasks can take new tasks.
- Stop submitting last-minute pull requests.

Actions to start doing:
- Start taking 1 task at a time so that there are open tasks for others to take when their current task is finished
- Submit pull requests before the last day of the sprint.
- Write tests for edge cases.
- Follow Definition of Done criteria for user stories and tasks

Actions to keep doing:
- Continue to use GitHub for version control
- Use Slack to notify the team when a pull request is made before merging.
- Use Jira to keep track of the status of user stories and their tasks
- Show up to meetings on time; we have been doing a good job of this.
- Using slack and zoom to discuss any possible problems with the team outside meetings.
- Keep track of possible errors or edge cases within our code. Test our code from the user's perspective.
- Time estimates for user stories

Work completed/not completed
Completed:
- PT-19: As a user, I want to be able to visualize which companies viewed which pages.
- PT-30: As a user, I want to be able to know page viewers got to the end of the page.

Not Completed:
- None

Work completion rate:
    User stories completed during sprint: 2
    Estimated ideal work hours: 30 hrs? 6 hrs/person
    User stories per day: 0.14
    Ideal work hours per day: 2.14
    Number of days during sprint: 14
